How to logon mait.local or dragon.local as a non administrator

These slides show how to logon to mait.local or dragon.local without using Remote Desktop. The class servers do not allow non-administratio accounts to logon using Remote Desktop. This is also good for connecting your client system to the servers to install programs.

Map Network Drive

What network folder would you like to map?

Specify the drive letter for the connection and the folder that you want to connect to:

Drive: P:

Folder: \\chile\zenonapps Browse...

Example: \\server\share

Reconnect at logon

Connect using different credentials

Connect to a Web site that you can use to store your documents and pictures.

Finish Cancel

You may choose any letter of the alphabe that makes you happy for the drive letter. Naturally, you will not choose C: or D because those letters make you unhappy.

Put the unc path in the folder box. UNC format is \\server\share. In this example, chile is the server and zenonapps is the share Your share is your organizational unit name ir place of zenon.

Uncheck the reconnect at logon, it makes life a bit simplier.
