

This is a demonstration of using OpenOffice 3.2.1 running a mail merge to create a logon creation batch file for Microsoft Active Directory on Server 2008 R2.

This is done in only 58 slides.

AC7 fx Σ = Number of Days

This column identifies the group scope. Currently this is set to be a global group.

This column is used if we run the mail merge to create groups.

This is the answer to the following question. Is the password good forever? The answer is yes or no.

Answering no meaning the password expiration follows system policy for expiration.

This is the sample merge document in Writer. It is very similar to Word. However, the variable are identified differently. Also, the search and replace for paragraphs is much harder, so this is set in landscape legal orientation. Now, we do not need to search and replace paragraph marks.
