

Windows IP Monitor filter deletion

The presentation uses the IPsec Policies to delete a Windows 7 and Windows 8.0 configuration. Both computers are on an IPv4 NAT network.

Manage IP filter lists and filter actions

Manage IP Filter Lists

Manage Filter Actions

This dialog box allows you to create and maintain the filter actions that define the security of your network.

The available filter actions are shared by all IP Security policies.

Filter Actions:

Name	Description
Windows 8.0 IPv6 Filter Action 01	This is Windows 8.0 IPv6 Filter A...
